SAF-FEST CORD TROLLEY

is just such a product

Use for any Festoon system
Will not wear out
Absolutely safe
Low in price
Maintenance free
Easily installed
by regular personnel

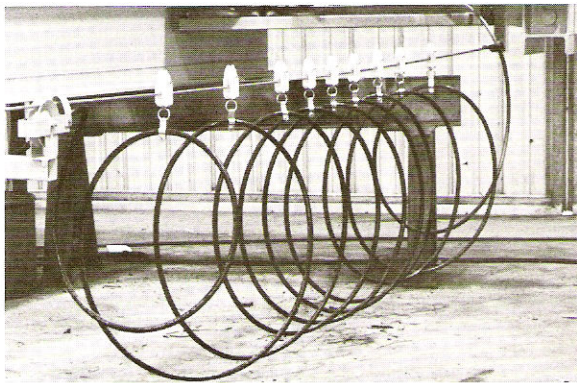

For use with cranes, hoists, hydraulic and pneumatic systems, sawmill carriages, machine tools, assembly lines, displays, exhibits and many other applications.

Pat. Pending

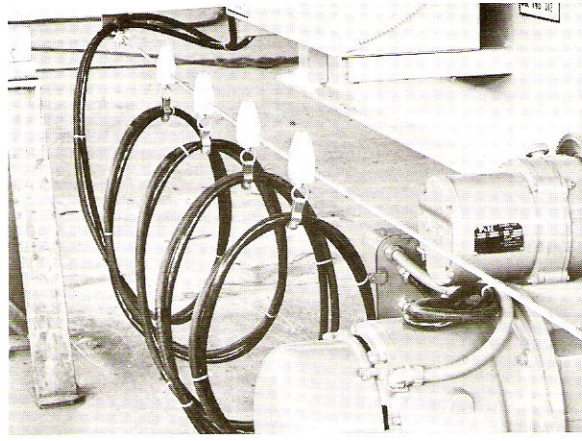

ROVING PENDANT STATION

The Saf-Fest Cord Trolley frees operator from hoist load area, allows him to walk safely along clear aisles.

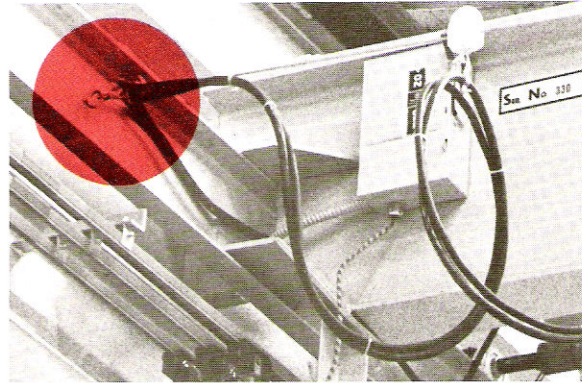

NON-TWISTING FEATURE

Trolley's cord clamping device will not rotate completely. Cord remains properly aligned and coiled, no twist or tangle.

MULTI-CORDS NO PROBLEM

With one cord securely attached to Saf-Fest Cord Trolley, additional cords or hoses can be attached easily without changing or adjusting trolleys. Extra weight is not a factor.

EASY 2-HOLE INSTALLATION

Regular personnel can handle installation. Simply drill two holes and affix messenger cable.

The Best Reason For Using The SAF-FEST Trolley Cord-Support System Is That Once It's In Place, You'll Never Have To Touch It Again.

Saf-Fest Trolleys are made of tough, abrasion-resistant nylon. The trolley wheel requires no lubrication and turns freely, eliminating friction on the messenger cable. Trolleys can be added or removed in seconds without disturbing the System.

SAFETY

The Saf-Fest Trolley System has no exposed electrical wires or components and requires none. Plant personnel can move freely about.

FLEXIBILITY

With the Saf-Fest Cord Support System you can change conductor sizes without changing the System. Can be used with hydraulic or pneumatic hoses, even in combination with electrical cords. The System performs equally well indoors, outdoors, and in all types of corrosive or hazardous locations.
